The current draft does not do enough. The plan must include:

- *Removal of at least 1,000 acres of polluted sediment from the river.
- *Requirement that eating fish from the Lower Willamette is just as safe as eating fish from anywhere else in the Willamette River system and this must occur within a 10-20 year time frame.
- *Provisions for dredged sediments to be taken to an appropriate landfill.
- *Requirement that entities responsible for the pollution pay for a comprehensive cleanup that will protect the health of our communities, our environment and our wildlife.
